LeetCode

EDUCATION

- **SRM University - AP** Andhra Pradesh, India
B.Tech in Computer Science and Engineering CGPA: 9.38/10 2023 – 2027
- **SR Junior College** Guntur
Intermediate (AP Board) Percentage: 98.4% 2021 – 2023

TECHNICAL SKILLS

- **Languages:** C, C++, Python, JavaScript, SQL
- Frontend:** HTML5, CSS3, React.js, Tailwind CSS, Bootstrap
- Backend:** Node.js, Express.js, Flask, REST APIs, JWT Authentication, Socket.io
- Databases:** MySQL, MongoDB
- AI & Tools:** Google Gemini API, Prolog, Git, GitHub, Postman, VS Code, Figma
- Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

EXPERIENCE

- **HCLTech** Remote
Software Engineering Intern June 2025 – August 2025
 - **Analytics Dashboards:** Built responsive business dashboards using HTML, CSS, JavaScript, Bootstrap, and Chart.js, visualizing sales trends, customer behavior, and product performance for a live e-commerce analytics platform.
 - **API Integration:** Integrated dashboards with REST APIs, validating end-to-end data flow between frontend visualizations and backend services in collaboration with the backend team.
 - **Agile Delivery:** Collaborated in a five-member Agile team across backend, database, and machine learning functions to deliver an e-commerce analytics platform within project milestones.
 - **Reporting Components:** Built reusable, export-ready chart components supporting sales forecasting, customer segmentation, and profitability analysis KPIs.

PROJECTS

- **Zyviora – Hybrid AI Companion System** GitHub — Live Demo 2026
Flask, Python, Prolog, PySwip, Google Gemini API, JavaScript
 - **Hybrid Reasoning Engine:** Built a priority-based routing pipeline checking user input against 7 Prolog modules (emotion, conversation, productivity, interview prep, knowledge, decision support, wordle) via keyword pattern matching, falling back to Google Gemini only on unhandled intents – giving deterministic, zero-latency responses for structured interactions.
 - **Client-Side Intelligence:** Built 8+ JavaScript modules (memory, mood tracking, reminders, goal tracking, proactive checks, crisis-support detection) that intercept and resolve requests locally before reaching the backend, reducing unnecessary Gemini API calls.
 - **System Architecture:** Designed a modular architecture separating the Prolog engine, Gemini fallback, and frontend intelligence layers, iteratively testing each module during development to confirm correct routing behavior.
- **Tech Resale Hub – Full Stack Marketplace Platform** GitHub 2026
React, Node.js, Express.js, MongoDB, Socket.io, JWT, Multer
 - **Role-Based Marketplace:** Built a full-stack marketplace with **3 role-based permission tiers** (Buyer, Seller, Admin) using React and Node.js/Express, including product browsing with real-time filtering (category, condition, price, location) and a wishlist system.
 - **Secure Backend:** Designed the MongoDB schema and REST API layer with JWT authentication and RBAC middleware – manually verifying that role-restricted routes correctly blocked unauthorized access – and used Multer to handle product image uploads.
 - **Real-Time Messaging:** Integrated Socket.io for real-time buyer-seller negotiation chat, testing message delivery across multiple accounts to confirm real-time sync.
- **BizVaani – Voice-First Retail OS (Team Project)** GitHub — Live Demo 2026
Next.js, React, FastAPI, WebSockets, PostgreSQL, Tailwind CSS
 - **Frontend Contribution:** Built the signup/login, landing, dashboard, and inventory UI pages as a frontend contributor on a 5-person hackathon team.
 - **Voice-First Retail Concept:** Contributed to a Voice-First Retail OS concept (FastAPI, WebSockets, and PostgreSQL backend built by teammates) spanning inventory, invoicing, forecasting, and voice-assistant features.

ACHIEVEMENTS

- Solved **223+** Data Structures & Algorithms problems on LeetCode, strengthening problem-solving and algorithmic thinking.
- **Top 6 Finalist** at the national-level **Mission Schrödinger Cat Hackathon**, competing against 200+ participants.
